ZOOMLION | Industry Innovation

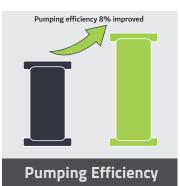

Boom intelligent damping technology: The soft control of booms in starting, slewing and stopping reduces the impacting vibration of booms, which gives the boom more stable operation.

Adaptive Concrete Material Pumping Technology: Improved pumping control system for poor concrete with segregation and big viscosity, and auto-adaptive pumping mode, which reduces the blockage rate by more than 50%.

Adaptive Power Distribution Control Technology (APD): Automatically changing power mode according to pumping situation, the engine always work at economic oil consumption area that saves oil by 15% compared to other brands.

Accurate Pumping Control Technology (APC): An industry first, pumping control mode can be changed to match your working situation. Displacement sensor is used to detect and control the movement of pistons. The accuracy of each stroke can be controlled within 99.46%. This advantage cause the pump is more controllable, and pumping efficiency reached an unprecedented level.

ZOOMLION's experimental platform is a world leading platform, guarantees the high quality of ZOOMLION products. The boom structure has been tested no cracks for pumping 450,000 cubic meters concrete or after 8 years using. ZOOM-LION's high quality products gives you confidence and safety at work.

Long life, cost-effective parts are designed to maximize its convenience for tear down and maintenance. Anti-wearing material is used at the wearing position of elbows. Double-layer pipes are used to hold the strong puming performance. These robust parts keep you running in a low-cost and convenient way.

ZOOMLION

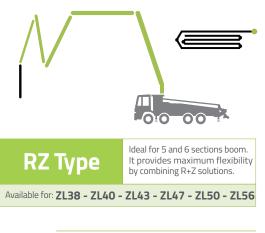

38X-5RZ

Standard Equipment

- Compact design, 38m pump mounted on 3-axle truck .
- Efficient pumping unit, ideal for long time use.
- Agile placing boom with 5 arms, and unifolding height only 7.9m (25'11"), which gives a wide work range.
- Proportional radio controls with two speeds boom movement, automatic frequeny scanner.
- Double-layer concrete pipes ensure the working reliability.
- Centralized lubrication system for pumping unit.
- Durable wear plate and cutting ring for pumping unit.
- OSS (One-side support).
- Alluminum hopper covering.
- Double water pumps (High and low pressure).
- Use & Maintenance Manuals.
- Spare parts and service manual.

Optional

- Chassis brand: Mack, Freightliner, AutoCar, and etc.
- Other configuration on demand.

Placing Boom Technical Data

Model			38X-5RZ
Pipeline diameter		5″	125 mm
Maximum vertical reach		121'8″	37.1 m
Maximum horizontal distance (from center of slewing axis)		106'2"	32.36 m
Minimum unfolding height		25'11"	7.9 m
Section numbers			5
1st section	Length	25'7"	7795 mm
	Opening angle		90°
2nd section	Length	20'3"	6175 mm
	Opening angle		180°
3rd section	Length	18'10"	5740 mm
	Opening angle		180°
4th section	Length	21'1"	6445 mm
	Opening angle		240°
5th section	Length	22'10"	6955 mm
	Opening angle		195°
Rotating angle			±270°
End hose length		9'10"	3 m

Pumping Unit Technical Data

Model		PU1709
Maximum theoretical output	222 yd³/h	170 m³/h
Maximum pressure on concrete	1276 psi	88 bar
Concrete cylinders (diam. x stroke)	9″x6′11″	230x2100mm
Concrete hopper capacity	156 gal	600L
Hydraulic circuit		Open
