TRUCK-MOUNTED CONCRETE PUMP

Placing boom Pumping unit Driven by Chassis K50-6RZ PU1709 PTO Gearbox Cabover/Conventional

ZOOMLION | Industry First

MBIT - The smartest arms

Zoomlion multi-boom intelligent technology is an industry leading, precise boom control technology. Reducing impacts during movement of boom and slewing device by controlling the volume flow of hydraulic oil. Zoomlion intelligent "brain" gives you a smooth and stable control of boom, which ensures your work done safely and precisely.

Active Boom Vibration Control Technology (ABC)

Zoomlion active boom vibration technology is an outstanding innovation, which decreases the vibration of boom enormously. 50-meter and above models are equiped with solenoid valves for damping absorption.

This technology has been tested in complex conditions to reduce the damping of boom by more than 60%. The displacement of boom end has been controlled within 0.4m.

Intelligent control - Your pumping expert at any time.

Curve-buffer control of boom - gentle start/stop.

Boom hydraulic oil flow automatic matching, oil pump speed automatic adjustment. Boom work more stable and energy-saving.

Auto fault diagnosis - computer keep monitoring any potential riscks.

ZOOMLION | Industry Innovation

Boom intelligent damping technology: The soft control of booms in starting, slewing and stopping reduces the impacting vibration of booms, which gives the boom more stable operation.

Adaptive Concrete Material Pumping Technology: Improved pumping control system for poor concrete with segregation and big viscosity, and auto-adaptive pumping mode, which reduces the blockage rate by more than 50%.

Adaptive Power Distribution Control Technology (APD): Automatically changing power mode according to pumping situation, the engine always work at economic oil consumption area that saves oil by 15% compared to other brands.

Accurate Pumping Control Technology (APC): An industry first, pumping control mode can be changed to match your working situation. Displacement sensor is used to detect and control the movement of pistons. The accuracy of each stroke can be controlled within 99.46%. This advantage cause the pump is more controllable, and pumping efficiency reached an unprecedented level.

ZOOMLION's experimental platform is a world leading platform, guarantees the high quality of ZOOMLION products. The boom structure has been tested no cracks for pumping 450,000 cubic meters concrete or after 8 years using. ZOOM-LION's high quality products gives you confidence and safety at work.

Long life, cost-effective parts are designed to maximize its convenience for tear down and maintenance. Anti-wearing material is used at the wearing position of elbows. Double-layer pipes are used to hold the strong puming performance. These robust parts keep you running in a low-cost and convenient way.

50X-6RZ

Standard Equipment

- Compact in design, 50m pump mounted on 4-axle truck.
- Efficient pumping unit, ideal for long time use.
- Agile placing boom with 6 arms, and unifolding height only 13.8m (45'3"), which gives a wide work range.
- Proportional radio controls with two speeds boom movement, automatic frequeny scanner.
- Double-layer concrete pipes ensure the working reliability.
- Centralized lubrication system for pumping unit.
- Durable wear plate and cutting ring for pumping unit.
- OSS (One-side support).
- Alluminum hopper covering.
- Double water pumps (High and low pressure).
- Use & Maintenance Manuals.
- Spare parts and service manual.

Optional

- Chassis brand: Mack, Freightliner, AutoCar, and etc.
- Other configuration on demand.

OSS Available

Placing Boom Technical Data

Model			50X-6RZ
Pipeline diameter		5″	125 mm
Maximum vertical reach		161'9"	49.3 m
Maximum horizontal distance (from center of slewing axis)		145′4″	44.3 m
Minimum unfolding height		45'3"	13.8 m
Section numbers			6
1st section	Length	32'12"	10050 mm
ISt Section	Opening angle		90°
2nd section	Length	25'7"	7800 mm
	Opening angle		180°
3rd section	Length	24'4"	7420 mm
	Opening angle		180°
4th section	Length	32'2"	9800 mm
	Opening angle		225°
5th section	Length	18'9"	5730 mm
	Opening angle		195°
6th section	Length	14'9"	4500 mm
oursection	Opening angle		210°
Rotating angle			±270°
End hose length		9'10"	3 m

Pumping Unit Technical Data

Model		PU1709
Maximum theoretical output	222 yd³/h	170 m³/h
Maximum pressure on concrete	1276 psi	88 bar
Concrete cylinders (diam. x stroke)	9″x6′11″	230x2100mm
Concrete hopper capacity	156 gal	600L
Hydraulic circuit		Open
